L J Institute of Engineering and Technology

NOTION

Notion is a festival consisting of various technical as well as non-technical events. The events were not pertaining to some particular branch; instead it was a complete package of events from various branches of engineering for maximum involvement of students of different streams. There was an event for everyone's taste and area of interest such that no student would feel left out from participating. Along with the technical events there were various non-technical events also which would gain maximum attraction as there was no need of any particular engineering skill set to participate in them.
